Labman One Launched; Provides Laboratory Management Services to Improve Operation, Efficiency

Auburn, Massachusetts, USA – Labman One, LLC opened its doors effective January 1, 2008, a contract service company dedicated to improving the efficiency and productivity of high-tech laboratories.

Founder and owner James Loach, in making the announcement, describes Labman One's purpose: "For many small companies in high tech, Laboratory Management is a collateral duty for an engineer or manager. When the workload of primary and collateral duties consumes too much bandwidth, something has to give. Labman One was created to fill this need, to pick up the slack. Our service promises to manage debug and repair services, increase productivity, improve efficiency, and get the entire lab operation organized!"

By taking advantages of the benefits of timesharing, Loach says, customers can have an experienced, professional Lab Manager in-house in their own facility for only the amount of time that the company requires, allowing their engineers and engineering managers to focus on what they do best. Flexible service plans range from total lab management to just a few hours of repair service, or just someone to perform preventive maintenance each week.

Labman One Rework Station at Avici Systems, Inc.

Recently, Labman One was chosen by Avici Systems to provide laboratory management services. Avici Systems is a leading provider of purpose-built carrier-class routing solutions for the Internet. Working in partnership with Lightspeed Manufacturing, an EMS provider in Methuen, Mass., Labman One and Lightspeed jointly provide depot repair services and manage Avici's maintenance program for its routers.

Labman One, LLC is owned and operated by Mr. James Loach. Jim brings over 15 years of experience in managing instrumentation, manufacturing and hardware engineering labs. After serving 9 years in the US Navy submarine service as a chief reactor operator, he managed an instrumentation shop for an air separation facility consisting of over 300 pieces of metering and test equipment. Jim holds Bachelor of Science degrees in Sociology from Excelsior College and Electronic Engineering Technology from UMASS Lowell.

About Labman One, LLC

Labman One, LLC, headquartered in Auburn, MA is a provider of Electronic Laboratory services for the High Tech Industry. Services include component level debug and test of electronic assemblies, calibration and preventive maintenance program management, laboratory organization and asset control, among others.
