### **Labman One Contracted to Provide Engineering and IT Services for Satellite Communications Leader ViaSat**

*Auburn, Massachusetts, USA* – Labman One, LLC is pleased to announce that the existing Laboratory services contract with ViaSat, a producer of innovative satellite and other digital communication products for commercial and government markets, has been extended and expanded to Information Technology and Information Security services.

James Loach, founder and president of Labman One, said “We’re pleased to be providing an extended range of services for ViaSat. We’re continue to manage the ESD (Electro-Static Dissipation) and test equipment calibration programs for the Marlborough Engineering Center. In addition, we are excited to provide the additional IT services requested. Our ability to provide expertise across a broad range of high tech services is a perfect fit for this engineering center, which is far removed from ViaSat’s corporate headquarters in Carlsbad, CA. Remote IT support can only do so much. Sometimes you need the on-site technician, and that’s where Labman One provides exactly what is needed, when it is needed.”

#### **About ViaSat**

ViaSat produces innovative satellite and other digital communication products for commercial and government markets. ViaSat products enable fast, secure, and efficient communications to any location, bringing today’s new communication applications to people out of reach of terrestrial networks with a variety of networking products.

Company headquarters are in Carlsbad, California, USA, web site:

<http://www.viasat.com>.

#### **About Labman One, LLC**

Labman One, LLC, headquartered in Auburn, MA is a provider of Electronic Laboratory services for the High Tech Industry. Services include component level debug and test of electronic assemblies, calibration and preventive maintenance program management, laboratory organization and asset control, among others. Labman One, LLC is owned and operated by Mr. James Loach. Jim brings over 15 years of experience in managing instrumentation, manufacturing and hardware engineering labs. After serving 9 years in the US Navy submarine service as a chief reactor operator, he managed an instrumentation shop for an air separation facility consisting of over 300 pieces of metering and test equipment. Jim holds Bachelor of Science degrees in Sociology from Excelsior College and Electronic Engineering Technology from UMASS Lowell.

For more information, contact James Loach and Labman One at 16 Inwood Rd., Auburn, MA 01501 USA, Tel. 978.873.0154; or visit [www.labmanone.com](http://www.labmanone.com).
